How to install a GSM printer in Windows 11

Brian McQuaig - 2025-09-19 - [Comments \(0\)](#) - [All Visitors](#)

How to install a GSM printer in Windows 11

Introduction:

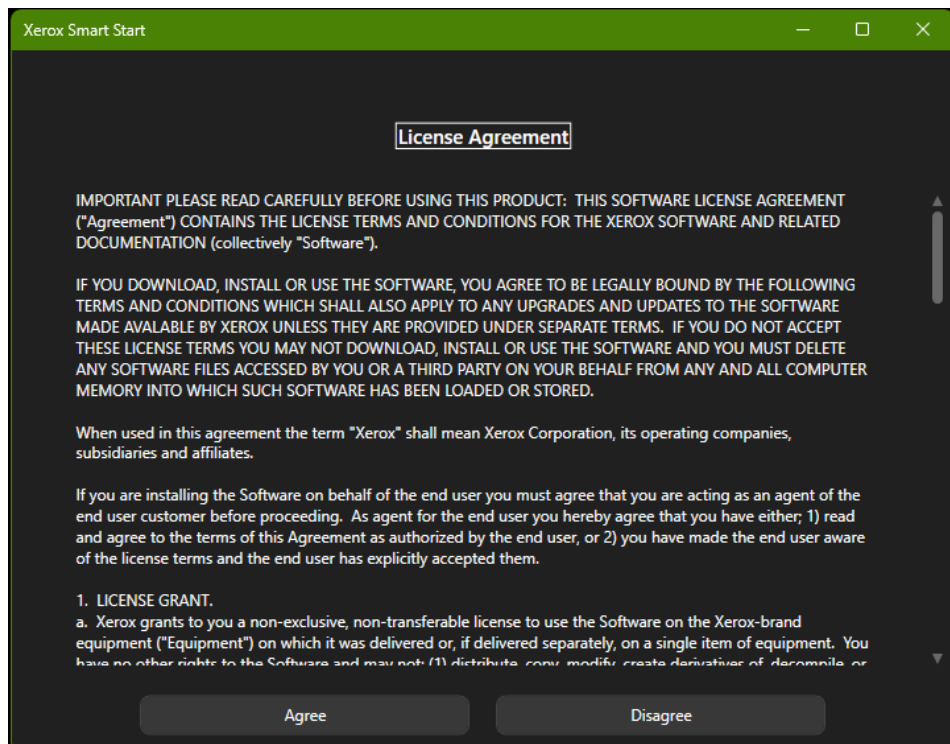

This document will show you how to set up printing with any of the GSM printers located in Gallagher Hall (UC Davis Main Campus) and Bishop Ranch (San Ramon).

Prerequisites:

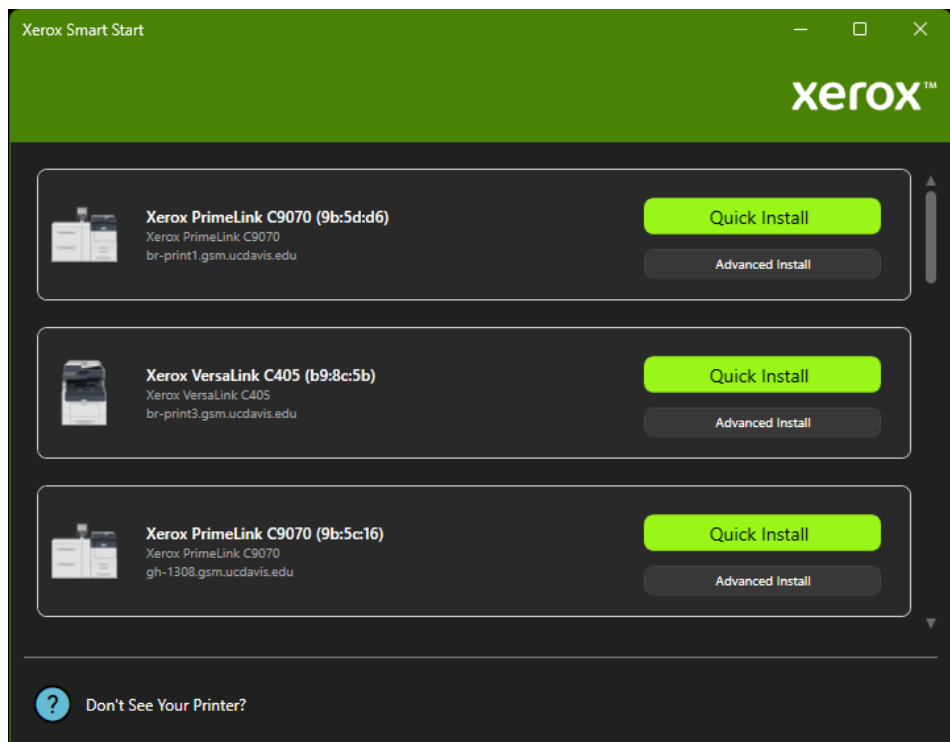

- You are using Windows 11
- You have admin access to the computer.
- You know how to install Windows software.
- You are connected to eduroam

Procedure

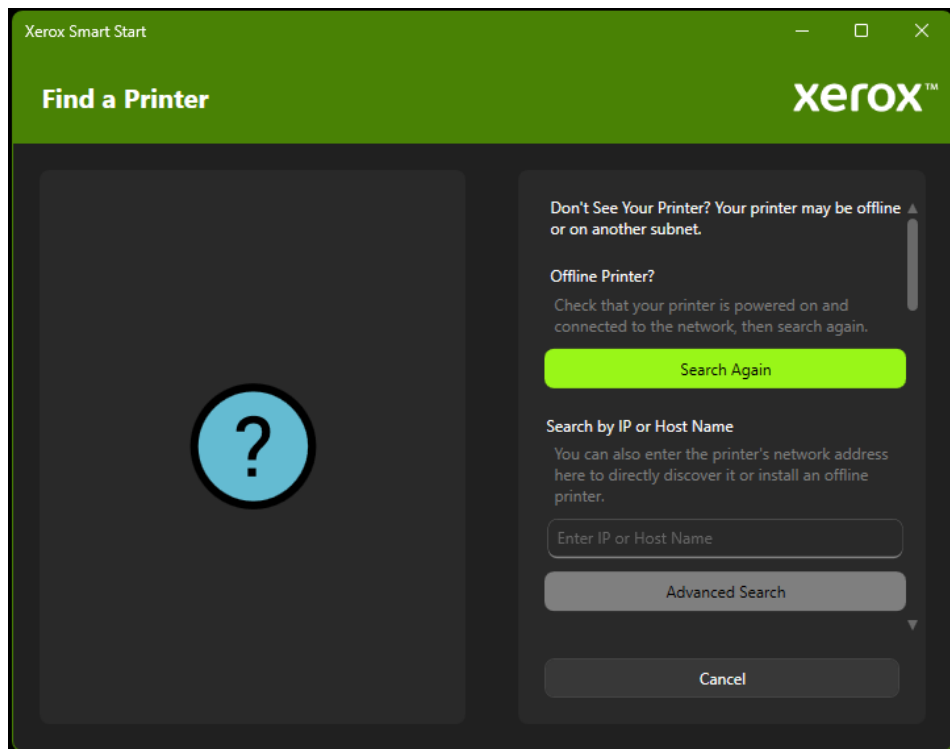

- Download the printer driver for your system
 - <https://www.support.xerox.com/en-us/product/altalink-c8100-series/content/143617>
- After the .exe package is downloaded, launch the installer.
- You'll get the dialog: **Xerox Smart Start License Agreement**, select Agree.

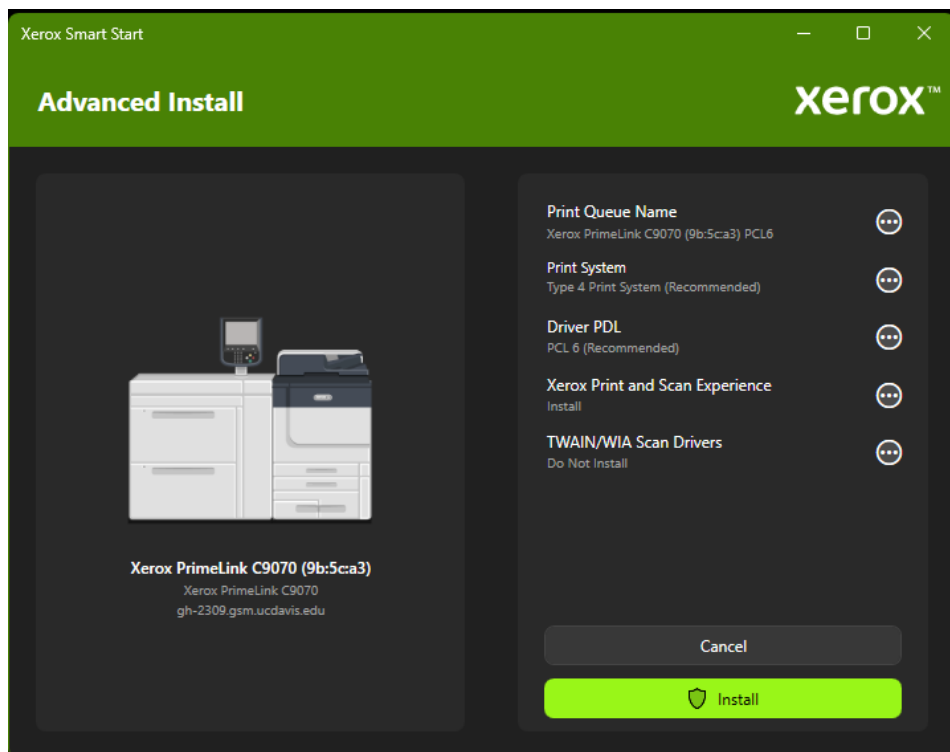

- Xerox Smart Start will search for printers on the local network. After a few moments the following will appear in the lower left corner. **? Don't See Your Printer?**, select this option. Do not use the 'Quick Install' option for the printers that do appear.

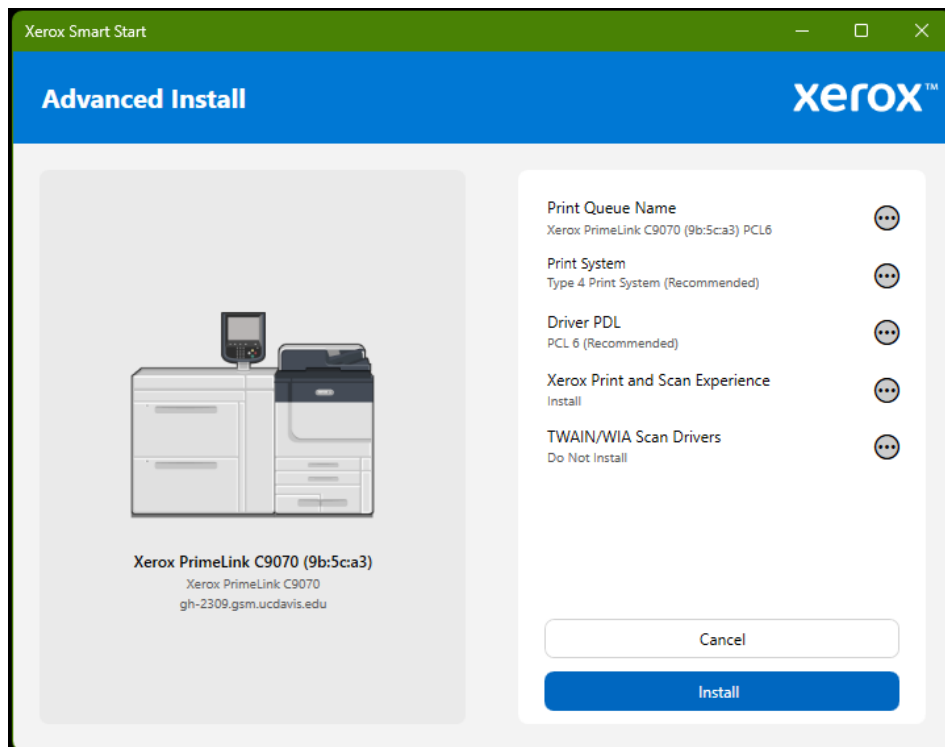

- Xerox Smart Start will allow you to **Search by IP or Host Name**, enter the desired printer Host Name from the list at the end of this article.

- Xerox Smart Start will find the printer and provide an **Install** option. Leave all settings default and select **Install**. This will require Administrator level access to your device.

- Xerox Smart Start may prompt you to **Install** one more time after the UAC prompt appears and you accept it. Select **Install** one more time.

- Xerox Smart Start will finish the installation, select **Done**.

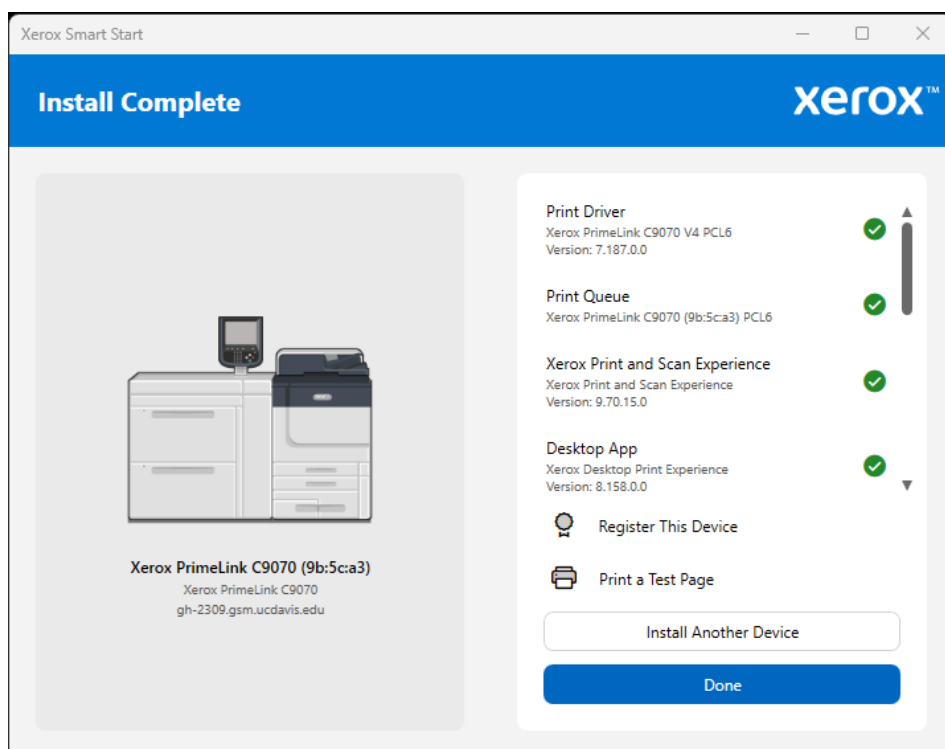

Table of Available GSM Printers

List of printers available at Bishop Ranch, San Ramon

Host Name	Location
